

AquayaLEARN Fellow, Edinah Samuel, observes a water tank in Kajiado County, Kenya during a field visit for WASHPaLS.

WASHPaLS (Water, Sanitation, and Hygiene Partnerships for Learning and Sustainability) is a USAID funded program managed by Tetra Tech. Aquaya serves as a subcontractor conducting a number of sanitation research activities.

Every Little Bit Helps AmazonSmile Bonus Promotion

From Oct. 29 - Nov. 2, AmazonSmile will increase the donation rate by 10x on all eligible smile.amazon.com purchases to 5%!

This will be their largest bonus donation promotion to date!

This is a great way to support Aquaya by doing something you are likely already doing - shopping at Amazon. In case you missed it, Amazon has a foundation that donates 0.5% of your eligible purchased on Amazon to a charity of your choice. If you shop at smile.amazon.com, the donation will be made at no extra cost to you and will be delivered directly to Aquaya! Since many products are eligible, this is a great way to support an organization by doing something you are already doing.

How to set it up:

- When shopping at Amazon, instead of going to www.amazon.com, go instead to smile.amazon.com.
- Sign in to your Amazon account.
- From your desktop, go to **Your Account** from the navigation at the top of any page. Select the option to **Change your Charity**.
- From your mobile browser, select **Change your Charity** from the options at the bottom of the page.
- Select The Aquaya Institute to support us!

Other News from Aquaya:

- Aquaya has received an additional contract with Water and Sanitation for the Urban Poor (WSUP) under their [Urban Sanitation Research Initiative](#) to better understand fecal waste emptying services in low income areas in Kisumu, Kenya. The study will aim to identify policy measures to improve emptying services, in collaboration with stakeholders.
- Our team keeps growing! Chloé Poulin is the latest addition to our team as a Research & Program Manager based in Nairobi. Chloé has just completed her PhD from Aix-Marseille University, studying the hydrology of the Lake Chad Basin.

Aquaya staff lead a Focus Group Discussion in a low income area in Nakuru, Kenya to better understand the existing sanitation conditions. This is part of the WSUP Urban Sanitation Research study being conducted in Kenya, Ghana, and Bangladesh.
